Job Position: **Team Leader / Full Stack Developer**
Location: **Onsite / Hybrid / Remote**
Experience: **7+ years**

A Team Leader who will be taking on additional responsibilities beyond coding. They will be responsible for managing a team of developers and overseeing the technical direction of the software.

Responsibilities:

- Manage and lead a team of developers to deliver high-quality software products that meet business requirements.

- Collaborate with cross-functional teams such as product management, quality assurance, and operations to understand business requirements and develop technical solutions.

- Develop technical solutions to complex problems using industry-standard practices and techniques.

- Set coding standards, oversee development processes, participate in code reviews, and mentor team members to ensure code quality, maintainability, and scalability.

- Stay up-to-date with emerging technologies, tools, and frameworks to help the team adopt best practices and improve the software development process.

- Work with stakeholders to understand business requirements and translate them into technical specifications and designs.

- Design, build, and maintain efficient, reusable, and reliable code that meets performance and quality requirements.

- Identify and address bottlenecks and bugs in the software development process, and devise solutions to mitigate and address these issues.

- Test the final product to ensure it is completely functional and meets business requirements.

- Provide technical guidance and assistance to the development team throughout the software development lifecycle.

- Ensure adherence to development schedules and deadlines.

- Present regular progress reports and set goals for the team.

- Collaborate with other Technical Leads and Engineering Managers to define and implement development strategies and best practices.

- Help maintain code quality, organization, and automatization.
